Windows satisfying every order-2 and order-3 Tur n inequality
feasible samples
$D_3 > 0$ (711,767)
$D_3 < 0$ (200,001)
Ξ windows $m = 2, \ldots, 198$
Lean witness $(\frac{1}{100}, 1, \frac{5}{4}, 1, \frac{1}{100})$
D_3/b_2^3 (symmetric log)
smallest normalized order-2 Turn margin $\min_j (1 - b_{j-1}\, b_{j+1}/b_j^2)$
